

Gains R2 Trucking License In Turkey

OOCL Logistics Turkey has obtained local R2 trucking license from Ministry of Transportation with effective from 1st January 2014.

Being granted the license allows OOCL Logistics to expand its service offering domestic and international trucking service between European, Middle East and CIS countries.

As a country, Turkey is often described as a bridge between Europe and Asia. The R2 license is one more step in the right direction to expand our network and multi-model transportation service.

With the growing demand for overland transport, OOCL Logistics Turkey is offering not only standard container service, but also tilt trailers and temperature controlled service.

To ensure safety and on-time delivery, we also offer satellite vehicle tracking system on trailers.

Continued Growth In India: OOCL Logistics Opens New Branch Office In Mundra

OOCL Logistics is pleased to announce the opening of a new branch office in Mundra, India in December 2013.

The new office is strategically located in North West India in the Kutch region of Gujarat. Port of Mundra is not only the largest private port of India, but it is also a special economic zone (SEZ) which attempts to accelerate foreign investment and promote exports from India by offering incentive policies, such as service tax

and central sales tax exemption.

The opening of new branch will help to further strengthen OOCL Logistics' position in the India market, enhance our network and provide a strategic mix of logistics, warehousing and domestic transportation solutions.

OOCL Logistics is responding to high demand for a reliable service provider and rapid growth of international trade in Kutch, by offering our customized supply chain solutions and our extensive

local knowledge to add a new link to connect worldwide customers with our quality service.

Since 2003, OOCL Logistics is headquartered in Mumbai, there are total 8 offices and over 50,000 sqm warehouse facilities located throughout the country. OOCL Logistics has an ambitious growth strategy for India and we plan the continual expanding our network at major commercial cluster in India in supporting to customers for both international and domestic services.

New Rail Services “Yiwu-Central Asia” And “Zheng-Europe” Launched In January 2014

Following the Trans-Siberian Rail service, new rail services connecting China – Central Asia and Europe have been launched in January 2014.

“Yiwu-Central Asia” - First cargo train linking east China and five central Asian countries operated on 20th January 2014 amid hopes it will boost development of the Silk Road economic belt spanning the Eurasia continent, Xinhau news agency reported.

The train travels 4,600 kilometers from Yiwu city in Zhejiang Province, passes through the Alataw Pass in China’s far west Xinjiang Uygur Autonomous Region and arrives in Almaty city in Kazakhstan. It branches off to cities in Uzbekistan, Kyrgyzstan, Turkmenistan and Tajikistan.

Central Asian countries have become vital export destination for commodities produced in Yiwu, where the wholesale market recorded more than 1.7 million types of goods to 219 countries and regions each day and the exports volume over 770 thousand TEU per annual.

“Zheng-Europe” International - Approved by China Railway Corporation, the first Zheng-European international train has departed on 4th January 2014 with 51 laden containers to 32 stations; the load capability has been increased 24% from 2013.

Cargoes moved from 7 provinces: Henan, Jiangsu, Zhejiang, Anhui, Liaoning, Shanghai and Guangdong to cover the production segments of auto-parts, energy bulbs, upscale clothing, robots, etc... to 12 European countries.

With shorter transport times and lower costs, the new land bridge extends from China to

Central Asia and Europe helping to improve trade.

After Beijing, Chinese inland areas now have direct overland rail freight route to Europe. China is also expanding the domestic train lines linking the major cities, such as Zhengzhou-Urumqi line, Zhengzhou-Gang line (Tianjin, Qingdao, and Lianyungang ports).

Combined with the economy of rail and efficiency of intermodal handling, OOCL Logistics can now offer new and exciting alternatives for importers in Central Asia and Europe. For more information, please contact with our Sales Representatives.

OOCL Logistics Footprint In China

OOCL Logistics was one of the pioneers in China consolidation services. Across 17 provinces, reaching from Manzhouli to Haikou, and Urumqi to East Coastal Areas, there are 50 offices and over 700 thousand sqm warehouse facilities strategically located through-out the country.

Our expansive office network, excellent equipment and dedicated staff enable us to provide the maximum control over every aspect of the PRC operations. We plan the continual expanding our network into 4th tier cities in

supporting the urbanization and local consumption-driven economy.

To facilitate domestic and international operations in China, OOCL Logistics operates both bonded and non-bonded warehouses specially suited to each client's supply chain requirements. We operate from multiple facilities and offer many warehousing capabilities such as cold storage, dry goods warehousing, bonded warehousing, and container yards for transshipment - all with 24-hour security services.

In China's emerging transportation environment, an effective and developed understanding of multi-modal logistics is essential.

We've developed a transportation network of more than 100 distribution centers and numerous cross-dock operations.

Whether your shipments need to move by truck, short haul or long haul, costal barge, rail or air OOCL Logistics has the expertise to ensure your goods will be managed with the fullest control and maximum efficiency via OOCL Logistics on-line data communications system, providing prompt and accurate documentation.

The blooming economy makes China the world's second largest consumer market next to USA. While China presents tremendous opportunity to retailers worldwide, there are risks and challenges they must manage. With our expertise in China, OOCL Logistics is assisting retailers to enter the market via e-tailing and/or physical stores to capture the opportunity while keeping risks at bay.
