

North American Warehousing & Distribution

Across the U.S.A. and Canada OOCL Logistics maintains dedicated facilities as well as coordinates multiple logistics providers to meet our clients' North American warehousing, deconsolidation, cross-dock, transloading and distribution requirements.

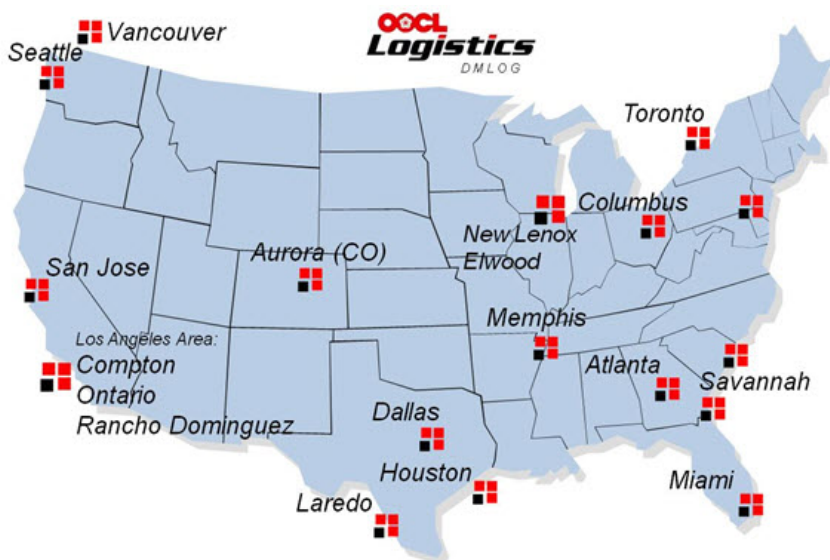

Warehousing

These OOCL Logistics facilities offer flexible warehousing and distribution services and give OOCL Logistics one of the most important links in the supply chain picture – destination cargo management capability across multiple modes. In 23 modern facilities across the continent, OOCL Logistics provides sophisticated warehouse and distribution services supported by advanced process management and information technology tools.

Information Integration

Some facilities utilize our purchase order management and shipment tracking system, PODIUM®, and our global inventory management system

to integrate information end-to-end across your supply chain. Logistics milestone updates such as transload data, gate-in and gate-out, trailer numbers and waybill reference

numbers are captured into our system, matched with the applicable purchase order(s), and provided to you via our Internet-base applications.

Warehousing Services that Add Value

These warehouses become an extension of OOCL Logistics; you will still have one phone number to call for assistance for all services – OOCL Logistics. All facilities have rail head connections on site or nearby and short-term and long-term storage and a full list of value added capabilities. With surveillance and 24 hour security

control, OOCL Logistics' warehouse operations also insure you'll receive outstanding product security.

Warehousing & Distribution Services

Depending on locations, OOCL Logistics offers the following standard and value added services:

- 24-hour order support
- Consolidation/de-consolidation
- Cross-docking and transloading
- Custom packaging
- Customer pickup
- D/C management
- Domestic trucking LTL/FTL
- E-fulfillment
- Export Packing/Shipping

Introducing our new warehouse in Thailand

We are delighted to announce that in February 2015 we opened a new dedicated OLL warehouse in Thailand.

Location

The warehouse is strategically located nearby the Lat Krabang Inland Container Depot (ICD) and 3 km to Bangkok on the main Chonburi Highway – with convenient access to Suvarnabhumi Airport and Laem Chabang Seaport.

Warehouse and Distribution

To serve your supply chain requirements, OOCL Logistics owns and partners with a network of best-in-class warehouses to handle multiple commodities, including raw materials, finished products and food products. Apart from simple storage, a wide variety of services are provided.

Our award-winning OOCL Logistics designed and implemented Warehouse Management System (WMS) accurately monitors and controls all warehouse processes, communicating with you

and your supply chain partners on inventory levels and warehouse activities in real-time.

Specifications & Facilities

The warehouse is 4,369 M2 and has 5 loading bays with 2 adjustable leveler bays. We can cater for 10 trailers at the same time with height 10 meters clearance in the parking area. It is equipped with a racking system and forklift, pallet and hand lift.

The warehouse is equipped with a state-of-the-art Fire fighting system and CCTV and meets all all C-TPAT and environmental safety requirements.

Trace your cargo on WeChat

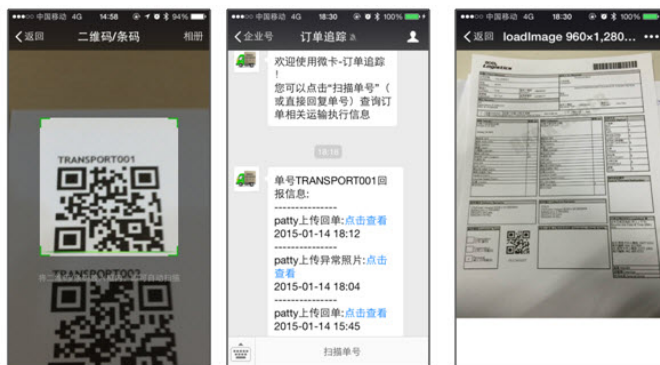

OOCL Logistics launched "Weika" in WeChat to facilitate our customers' to track and trace their cargo from picking up to delivery in real-time thru GPS and connect with our transportation portal.

Functions and Features

- Milestones: Weika can push standard milestones and we are able to customize milestones as needed
- Exceptions: Drivers can report any exception with pictures and GPS locations
- e-POD: Weika support both photos and e-Signatures
- GPS: Other than instant messaging,

Weika keeps all GPS information and also the historical positions. Auto geofencing is also enabled

- Order Tracking: Customer can track orders in real-time anywhere & anytime

Benefits

Thru Weika, OOCL Logistics' customers

can enjoy:

- Reduce administrative costs associated with order inquiry and follow-up with vendors
- Timely and proactive updates on order progress and exceptions that identify supply chain risks as early as possible
- Close monitoring on truck shipments to increase transport security
- On-site photos and ePOD facilitates supply chain auditing
- Visibility into service details with various activity milestones
- Objective measurement of vendor performance
