## Service Excellency Makes the Difference

OOCL Logistics is striving for top rankings in service and product excellence. Our China branch - OOCL Logistics (China) Limited was awarded 'National Advanced Logistics Enterprise 2016' and the 'China TOP100 Logistics Enterprise 2016' in November this year. These awards recognize our excellent performance and high service standards.

We continue to explore all opportunities to improve operation efficiency and quality. Part of OOCL Logistics (China) Limited's solutions is to make maximum use of the efficiencies

granted by being an Advanced Certified Enterprise (ACE) under the Authorized Economic Operator (AEO) program.

Demonstrating competence in operations, management, internal controls, compliance and other important elements of logistic services, the AEO credentials qualify OOCL Logistics for simplified customs procedures and clearance operations. The credential applies to import/export operations, where efficiently and smooth operation of logistic services ultimately benefit our customers.

Beyond China, OOCL Logistics' global network strives for the same levels of proficiency and customer service excellence in every service offering. For example, in the Philippines, OOCL Logistics has worked with business partners to secure roads to ensure the safe transport of oversize shipments bypassing unsafe bridges to plan shipment rerouting. OOCL Logistics' block train services to both Moscow and Ekaterinburg reduce long transit times of rail routes via Zabaykalsk, to speed the arrival goods to destination.

OOCL Logistics goes above and beyond to reach every higher levels of service excellence and can help Make All the Right Moves in your transportation and logistics world too.

For details on services and solutions, please contact your local OOCL Logistics sales representative.

# New Cold Chain Distribution Center opening in Wuhan, China

In November 2016 OOCL Logistics (China) Limited opened a new 3,600 sqm Cold Chain Distribution Center in Wuhan. The facility will support the growing demand for our cold chain logistic services.

The new 24-hour distribution center is located in the logistic hub along the Beijing–Hong Kong–Macau Expressway and connects with major highways. The location provides the benefits of convenient access to not only the ground transportation network, but its proximity to the Wuhan Tianhe International Airport.

The Cold Chain Distribution Center offers three temperature zones: a hyper-low temperature storage area (-18 degrees), a general cold storage area (0-5 degrees), and a constant temperature storage area (12-18 degrees). State of the art

equipment in the facility, including automated lifting platforms, electric forklifts, and advanced security systems, together with the OOCL Logistics' own Warehouse Management System, ensure smooth operations and that perishable products are maintained under the best possible conditions to guarantee freshness and quality.

The warehouse is equipped with the largest closed temperature-controlled delivery platform in China. 50m wide and 16m long, the platform facilitates environmentally controlled gate-in and gate-out of goods, allowing the facility to process 70,000 carton per-day. The logistic center also boasts a China Inspection & Quarantine Services meat products inspection station (Wuhan on-site office). This on-site office provides immediate inspection for products handled by the facility.

For more detail, please contact your local OOCL Logistics sales representative.

## MARKET TALK

The revised GB1589 in China, with stricter limitations on dimensions, axle loads and weight of road vehicles, has led to pressure on trucking resources and shortages of necessary vehicles. Carriers have had short supplies of trucks needed for the most common (40GP) container size.

There is some expectation that transportation costs in the market could increase, driven by these equipment shortages.

## OUR NEWS

OOCL Logistics Named "China Top100 Logistics Enterprise"

New Express Block Trains from China to Russia

*OOCL Logistics is a world-class provider of innovative logistics and supply-chain services and solutions, which has an extensive network of more than 130 offices in over 30 countries.*
