OOCL Logistics Continues Expanding in China

Despite rapid investment in warehouses in China over recent years, there is still a shortage of modern facilities and less than 20% of China's warehouses are up to global standards. This is insufficient to address the need for warehouse space driven by the rapid and huge e-commerce boom now going on in China. To meet the requirements of future growth in China, OOCL Logistics has expanded service coverage with the opening of more Logistics Centers.

The Logistics Centre in Guangzhou

The new multi-building facility is located in the Guangzhou Economic & Technological Development District East Zone, a well-developed industrial zone close to the city center of Guangzhou. This location provides excellent access to the surrounding road network making it a perfect choice to meet the current and future needs of a distribution center in the Pearl River Delta region. The warehouse provides around 78,000

SQM of already operating, high-quality warehouse space.

With our customers' supply chain requirements in mind, OOCL Logistics owns and partners with a network of best-in-class warehouses to handle a wide range of commodities, including raw materials, finished products, retail goods and food products.

Cold Chain Warehouse in Kunming

What's more, OOCL Logistics also opened a new Cold Chain Warehouse in Kunming, China in this January. This four-block multi-temperature zone controlled facility is located in the Kunming Economic and Technological Development Zone (KETDZ) Singapore Industrial Park. The KETDZ was approved by the State Council in February 2000 as a state-level development zone.

Located in the eastern part of Kunming, KETDZ takes advantage of the well-developed regional

transportation network with the Kunming-Shilin and the Kunming-Yuxi Expressways are immediately adjacent to the zone.

KETDZ is about 1.8 km from Kunming Wujiaaba International Airport and 4 km and 2 km respectively from the South and East Railway Stations. This strategic location provides the best access to the surrounding regional road network to meet current and future needs of a cold chain warehousing in Southern China's Yunnan Province near the borders of Myanmar, Laos and Vietnam where our regional offices are able to handle further distribution needs of yours.

For more detail on the Logistics Centre, follow the hyperlink here to the facility brochure on OOCL Logistics' website.

OOCL Logistics' Expansion in Europe

OOCL Logistics is expanding its network in Europe, setting up sole agent partnership agreements with Medfreight S.R.L. in Romania and Shipping Services Italia S.R.L. in Italy.

Romania -- Medfreight S.R.L.

Medfreight s.r.l is located in Bucharest. They provide a complete package of logistics solutions, door to door, for any commodity. With a wide range of partners all over the world, Medfreight can serve any transportation request. Trade for Romania is mostly centered on the member states of the European Union, with Germany and Italy being the country's single largest trading partners. Romania is also very close to the Western European core markets

and cargo can be trucked from Romania to Germany, the UK etc. within 2-3 days. Due to the increasing costs in China, Romania is expected to be one of the countries that benefits from trade shifts to lower cost sourcing locations.

Italy -- Shipping Services Italia S.R.L.

Italy, officially the Italian Republic has been a member of the G7 since 1975. Italy is the world's sixth largest manufacturing country, characterized by a smaller number of global multinational corporations than other economies of comparable size and a large number of dynamic small and medium-sized enterprises. The manufacturing sector often focused on the export of niche market and luxury products.

Shipping Services Italia is part of the privately-owned Fremura group with head offices in Livorno, Italy. They offer a wide range of services including but not limited to:

- Inland Haulage Transportation (FCL, LCL, FTL, LTL)
- Customs Clearance (Import & Export)
- Warehousing at Milano area
- Container Stuffing & De-stuffing
- LCL/LCL services
- Airfreight

OOCL Logistics continues to develop new partnerships in Europe to provide our customers quality service in this strategic and dynamic region.

OOCL Logistics Recognized for Keeping Canon's Supply Chain Moving

On 12th August 2015, Tianjin port operations were severely damaged by an explosion which impacted all logistics providers in the area and global shipping from Tianjin. Many business activities were interrupted and shipment delays were quite common in the aftermath. OOCL Logistics' Tianjin team provided solution-focused supply chain services, placing the maximum effort on minimizing potential delivery delays for our customers.

Recently, Canon expressed its

appreciation for OOCL Logistics' work in the aftermath of the explosion through recognition of "Highest Ability" with their "2015 Contingency Handling Award".

Canon's was very pleased with our ability to manage the downstream effects and contingency plans after the accident, stating, "After the explosion, OOCL Logistics' Tianjin Branch completed deliveries within 3 days for

every Canon import shipment even when Customs clearance by other port users at the port of Tianjin required at least 4 days. OOCL Logistics maintained the highest efficiency before and after explosion."

OOCL Logistics is honored to have been recognized with this award for our efforts.
