## OOCL Logistics Optimizes Supply Chains and Creates Value for Customers during COVID-19

OOCL Logistics continues to be a best in class, global supply chain provider. Our teams around the globe are committed to leading our customer's supply chains efficiently, especially during the COVID-19 pandemic. Our people react swiftly to different and challenging scenarios based on the changing needs of our customers circumstances. OOCL Logistics' priority is to continually support and manage our customer's supply chain operations during the fight against COVID-19.

As an example, the OOCL Logistics Guangzhou team provided a world class solution during China's 618 Mid-Year shopping festival.

In the lead up to the 618 festival, the OOCL Logistics Guangzhou team conducted a warehouse manpower planning meeting. It

quickly became apparent, due to the pandemic, it would be a difficult task to hire the large number of workers needed to support the mid-year shopping festival. As a result of the planning meeting and dedicated team efforts, more than one thousand casual workers were successfully hired to support the preparations and needs of the 618 festival.

With our customer's expectations of a 48-hour delivery during the 618 festival, and to ensure the health and safety of our warehousing employees, OOCL Logistics put in place specific workstations that not only facilitated high productivity but also adhered to the health and safety guidelines put in place due to COVID-19.

The pick and pack operation

deployed, utilized barcode scanning technology to ensure product quality and meet the delivery commitment set by our customer. As an added benefit our Guangzhou team was able to divide each workstation while streamlining the order processing and fulfillment process, creating superior productivity.

By ensuring our employees safety and their consequent hard work in meeting the 48-hour delivery commitment, our customer was greatly appreciative and expressed an eagerness to partner with OOCL Logistics for the upcoming "Double 11 Shopping Festival", the "Black Friday" of China's shopping calendar.

With resilience, adaptability, and collaboration between OOCL Logistics and its customers, we continue to be the critical factor to enable supply chain efficiencies for time-critical products. OOCL Logistics will continue to offer a full range of supply chain services creating unprecedented value to our customers.

# New Import Protection Law in Myanmar

At OOCL Logistics, we know the latest development of global market movements and regulations and immediately adapt to the changes while providing critical insights to customers in this ever-changing environment.

The Myanmar government issued Notification (83/2020) on 1 July 2020 regarding the 'Law to Prevent an Increased Quantity of Imports' effective on 1 July 2021. It was approved by the government on December 2019.

The law is anticipated to control the volume of products which are imported into Myanmar unnecessarily while support and protect domestic manufacturer and small and medium enterprises (SMEs) during the COVID-19 global economic recession. The protection committee will be formed by the Ministry of Commerce (MOC), while the private sector group will be represented by the Union of Myanmar Federation of Chambers of Commerce and Industry (UMFCCI).

They are aimed to investigate and evaluate the risk and impact of the increase in import entering in the Myanmar's local market. The domestic production will be overseen to see if it is affected by increased import volumes, rate of increase, the share of local production volumes, sales, productivity and conditions of employment etc.

Fuel, vehicles, construction materials and food products are the most common imported products in Myanmar. However, the new regulation is not applying to the product which is imported from developing countries or if it meets certain specified conditions through further enquiries.

OOCL Logistics is committed to developing the customer-oriented supply chain solutions to ensure smoother operation. We continue to keep monitoring the latest update of new import protection law in Myanmar while performing with reliability and responsibility toward our customers. For latest information, please contact your OOCL Logistics Representatives.
