Project Cargo: An Outstanding Performance Displays OOCL Logistics' Excellence

At OOCL Logistics, we strive to create forward-thinking solutions to satisfy the demands of our global customers while constantly searching and forming innovative logistics solutions that are specifically designed to suit the needs of every customer.

In August, OOCL Logistics Russia received a request from a client to deliver 5 industrial water heaters from Rotterdam, The Netherlands to Tambov Region, Russia. Our customer is a company that contracts and maintains greenhouses across Russia. We have been providing them with logistics services particularly the transporting of parts of

Greenhouses from tubes and glass wall to oversized elements.

Upon reviewing the project, the team arranged 40' Flat Rack for handling the oversized water heaters with 10 meters high and 3 meters in diameter. This special flat rack consists of a floor structure with a high loading capacity, which enhances flexibility and security of the cargo. We targeted to ship the cargo by sea and road transportation at the end of September. However, the water heaters were packed in shipping film, which was not strong enough to being partially torn during the sea transportation. OOCL Logistics' Russia team had to order repackaging of the cargo in a more reliable material - polyphenol chloride film to resistant the tears and damage.

After the discussion and coordination among different parties, we successfully managed to ship the water heaters to the arrival terminal in St. Petersburg while we had to negotiate with the related party to reload the goods from containers to another platform in order to avoid fines for

detention of special equipment.

Our seamless cooperation and communication with our client allowed us to succeed. The delivery of water heaters was done within the project schedule by sea and road transportation. This customer was highly pleased with our performance which helped us continue to maintain a valuable long-term relationship.

OOCL Logistics is always working hard to provide the best logistics service and to offer the optimal operating process for our clients which suits their specific needs. We will continue to fulfill our service commitment for every customer while providing comprehensive supply chain services.

Meeting Delivery Deadlines by Overcoming Multiple Challenges

At the end of October, OOCL Logistics received an urgent request from a well-known international company who has partnered with us over 10 years. We were requested to transport a full set of high-precision equipment from a factory in Germany to Shanghai. Due to the unexpected request and the complicated type of equipment, most of the vessels were fully occupied resulting in the cargo's inability to ship via ocean freight.

Upon reviewing the project, our international logistics team proposed to deliver the equipment through China-Europe Express Intermodal Services - Chang' An (Rail Freight). By utilizing this logistics solution, transportation cost can be minimized while fulfilling the tight timelines. The customer agreed to our proposed solution and we started to coordinate with different parties to prepare the railway transportation. Our plan was to depart from Duisburg, Germany via the China-Europe Express Railway and

transport the cargo to Shanghai by road after it arrives in Xi'an.

However, we were requested to control a high precision of transportation time. We needed to maintain a good condition of the large-scale equipment under a certain temperature and humidity and vibration during the long-haul transportation. Regarding a number of requirements, the International Logistics Shanghai team and the colleagues of the Xi'an team worked together to formulate a close tracking and guaranteed plan which properly arranged the resources of special vehicles as well as ensured the road transportation from Xi'an to Shanghai was safe.

Under our flawless workflow and cooperation, the high precision equipment was delivered to Shanghai within one month by railway and road transportation. Our customer was satisfied and highly appreciative with our arrangement and the tracking plan that provided a real-time transportation status and enhanced the visibility and reliability of the delivery.

MARKET TALK

The Regional Comprehensive Economic Partnership (RCEP) was officially signed on 15 November 2020 between 10 ASEAN members and five trading partners including Australia, China, Japan, New Zealand and South Korea.

It is aimed to facilitate investments and trade among regions and minimize operational costs. RCEP also involves provisions on trade in services, intellectual property, e-commerce, competition, procurement and dispute settlement etc. while it does not replace any existing Free Trade Agreements which currently implemented in ASEAN. As regions need to complete the ratification, the agreement will be targeted to take effect in the late 2021 or early 2022.

OOCL Logistics is a world-class provider of innovative logistics and supply-chain services and solutions, which has an extensive network of more than 140 offices in over 40 countries.

Providing advanced customer-specific solutions through our value-creating services and IT technology in supply-chain management; OOCL logistics' extensive service network and platforms will allow you to make All the Right Moves for your business. Our dedicated, quality people always provide you with tailor-made logistics solutions, customized to your particular needs.
