Revising the Indonesia-Japan Economic Partnership Agreement

Understanding IJEPA

IJEPA stands for the economic partnership between Japan and Indonesia, designed to enhance trade and economic collaboration. The Ministry of Foreign Affairs of Japan notes that about 2,000 Japanese enterprises have set up operations in Indonesia, accounting for roughly 8.5% of Indonesia's GDP and contributing nearly a quarter of Indonesia's export value.

The revisions to the agreement stipulate lower tariffs and the removal of tariffs on several goods that are traded between these nations, with particular attention to the fishery and processed seafood industry. The updated agreement also supports the growth of digital trade and reaffirms Japan's dedication to financing infrastructure projects within Indonesia, including transport, energy, and environmental projects.

Key Advantages

The enhanced IJEPA offers key advantages for Japan and Indonesia, such as:

- Strengthening trade ties and cooperation
- Lowering and eliminating trade tariffs and barriers
- Bolstering partnerships in finance and banking sectors
- Creating more investment opportunities
- Boosting product competitive edge
- Improving market access for Indonesian goods in Japan
- Japan's ongoing monetary backing for Jakarta's mass rapid transit development

OOCL Logistics' End-to-End Service

We provide an extensive array of logistics solutions that encompass cargo collection, international shipping, customs clearance, free zone storage, transport and distribution services, among others.

OOCL Logistics Commences a New Warehouse in Thailand

In collaboration with Electrolux, we are excited to announce the opening of our new warehouse in Thailand this May. Situated in Rayong, it's ideally situated just 1km away from the industrial estate and a mere 3km from the Electrolux factory. Customers benefiting from our latest facility will take advantage of its location, which helps to reduce both costs and transit times.

The site spans roughly 12,000 square meters, dedicated primarily to the safekeeping and storage of essential production raw materials. We prioritize safety and security, ensuring that the storage methods are up to par through comprehensive measures, including an advanced fire suppression system and extensive CCTV coverage. These precautions ensure we meet and exceed all the required standards for compliance and environmental protection.

Our warehouse also features an efficient racking system to streamline traceability, supporting effective pick-and-place activities as well as the loading and unloading processes. In response to Electrolux's evolving needs, OOCL Logistics provides a scalable warehousing solution. For instance, we are setting aside 30 to 40 x 40'HQ spaces for empty unit storage, ready to support a surge in finished goods capacity. This strategy enables swift export shipments via a "Drop and Pull" system, cutting down on trucking times and boosting overall efficiency.

OOCL Logistics brings a committed team and solid partnerships to the table, pledging to deliver high-performance, customized build-to-suit logistics solutions that elevate the value for Electrolux and foster shared growth.

OOCL Logistics Welcomes New Chief Executive Officer, Mr. Peter Pan

We are delighted to share the news that Peter Pan will take the helm as OOCL Logistics' CEO beginning in April 2024.

With a solid background encompassing more than two decades in the maritime shipping and logistics sector, Peter has been instrumental in spearheading a host of business projects, establishing lasting competitive benefits for our clients who require versatile international supply chain solutions within an ever-changing, high-stakes marketplace.

In alignment with our commitment to perpetual progress and client satisfaction, we are focusing on digital transformation, the integration of artificial intelligence technologies, and adherence to sustainable practices as pivotal aspects of our strategic outlook.

Peter comments, "Considering the rapid evolution of the global market and heightened customer expectations, the complete digitalization of our end-to-end processes is imperative. We are innovating within the technological sphere of our supply chains to enhance efficiency, streamline procedures, and promote growth."

Given his wealth of knowledge and proven guidance capabilities, we anticipate that Peter's fresh perspectives and drive for innovation will propel us forward. Under his direction, we are assured that our company will ascend to unprecedented levels of achievement.
